YOUR PRIVATE CELL CARE

Your skin lives in natural rhythms and in changing biologic phases. In addition, your skin has a very individual disposition for processing the large number of daily stress factors to which it is exposed. So your skin is unique. Each person's skin is different.

From this point of view, it is a good idea to give the skin "tailor-made" care. This works best if the cells are placed at the focus of the care program: the fitness of the cells determines how well your skin can adapt to biological conditions and how efficiently it can defend against the flow of daily stress factors. The cell is the magical key.

The modern alchemy of NOESA works with more than three hundred plant extracts and over eighty frequency liquids. Using this wide range, we can prepare an individual

set of effects for you that specifically optimizes the cells of your skin.

The foundation for this is a detailed "Landscape of Skin Problems" as well as a complex compass of targets, supplemented by skin diagnosis using measuring instruments: we assess the moistness and elasticity of your skin and the depths of the wrinkles.

All in all, you get a cell care program that is positioned far beyond the normal care possibilities because it integrates itself rigorously into the biology of your skin. The concept is deliberately individual. You give us a range for the costs and tell us for which zones of your body you want to use this individualized cell care program: face, décolleté, hands, body. Based on this, we produce your personal care substances in an amount that they last for about 1 year. There's nothing better.

REPAIR – VITALIZATION – ANTI-AGING – GLOW AND AURA

YOUR PRIVATE SOUL CARE

NOESA is a pioneer in the interaction of scent chords with the human brain. Since the early 1980s, we have been working on the neuronal effects of scents, especially in relation to mental energies and emotional moods.

For a time, NOESA has been offering a small set of MOOD PERFUMES.

NOESA is a pioneer in the interaction of scent chords with the human brain. Since the early 1980s, we have been working on the neuronal effects of scents, especially in relation to mental energies and emotional moods.

They are very popular and a big success. At the same time, we are developing individual mood

compositions, anti-stress compositions and stimulation compositions ... strictly aligned to your personal needs and your real-life situation.

The foundation for this is a specially developed test that diagnoses your personal cluster of emotions.

Based on this, we talk with you about what kind of strategy of effects you desire. Then we produce "tailor-made" Soul Care sets.

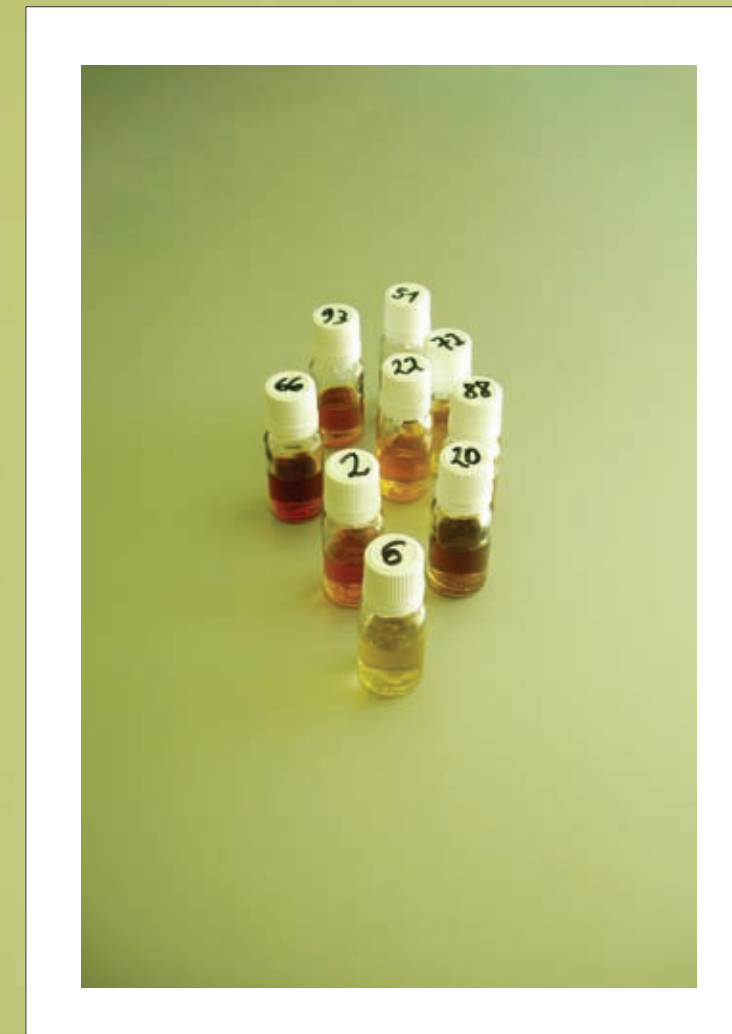

Especially for you, based on the noetic principles of Modern Alchemy.

In this case also, you give us a range for the costs, and we produce the sets for you in a volume that will take care of you for about 1 year.

THE ATTRACTORS

BETTER MOODS – ANTI STRESS – MENTAL STIMULATION

YOUR PRIVATE ENERGY CARE

Energies are a decisive key for the quality of life. When the energies become tired, you lose your Glow. When the energies become strong, Charisma is built up.

Energies can be shaped and refined. And precisely this is the concept behind our energy products.

They transform basal energies into a higher vibe status. This transformation can occur in 4 directions: Charisma, Empowering, Relaxing and Creativity. These are

the 4 clusters in which we work. Based on this foundation, individualization begins with a specially developed orientation test. This shows your personal energy disposition and helps us to develop an individual matrix ... a matrix that lets us compose, from over 600 plant extracts, precisely the set that fits in your personal energy pattern and which strengthens and refines your basal energy.

The procedure is the same as for Soul Care. You also receive a volume of the product that will last for about 1 year.

CHARISMA – EMPOWERING – RELAXING – CREATIVITY

YOUR PRIVATE SPA TREATMENTS

Since the early 1980s, the NOESA team has been working in the area of health through prevention. A large part of the developments that led to ALCHEMETICS® comes from various health coaching programs.

Now there is a broad spectrum of plant-based effect ensembles, oriented towards extensive prevention, detoxification, strengthening the immune system, anti-allergy and the harmonization of hormonal processes.

In this case also, we offer individualization, carried out on 5 clusters and a multistage diagnosis-target definition that is rigorously

aligned to your personal needs. The result is highly effective impulse substances – based on biophotons – that we refine into personalized Alchemetics.

What makes this program special is the multifaceted application forms: from a bath to a perfume spray. As a result, you can combine different prevention targets without things getting too complicated – your Private Spa should be fun!

In this case also, the procedure is the same as for Soul Care. You receive a volume of the product that will last for about 1 year.

PREVENTION – DETOXIFICATION – IMMUNIZATION –
ANTI-ALLERGY – HORMONE HARMONIZATION

YOUR PRIVATE PERFUME

All NOESA perfumes follow the principles of noeterics. This guarantees a novel concept for the effects of the scents: with the help of our patented carrier DANADEM®, the scent molecules are integrated into the lymph circulation of the body. As a result, the body's own scent is optimized in an integrated manner ... from the inside. Therefore, a very personal scent chord arises, which never has an "artificial" or "put-on" effect.

There are 3 clusters: Characters, Effects and Impressions. For Characters, the goal is the specific emphasis of your character. For Effects, the goal is intended to make your actions in the world more

effective. And for Impressions, the emphasis lies on emotionally enjoying scent melodies.

If each of these 3 clusters had to be described with just one keyword, the following concept arises: Characters define your Ego. Effects form your message. Impressions shape your daydreams.

Each cluster comes with an individual scent path that has been carefully specified previously in tests together with you. The procedure is familiar: you specify the range for the production costs. We produce individually for you and you enjoy our products for

THE WAY IS EASY: SEND ME AN E-MAIL

If you are interested in PRIVATE PRODUCTS, you should make an appointment with me so that we can carry out the required diagnoses and conceptual definitions together.

My email address:

GERD.GERKEN@NOESA.COM

In general, the products will last you for 1 year. The costs depend on the effort and the value of the plant extracts that are used. The one-year supply for the PRIVATE PRODUCTS has a price range between 7,500 and 15,000 EUR. You specify the price at the beginning. It is then binding for NOESA.

You can easily order a new supply every year by e-mail.
