

THE ABSOLUTE EDITION

HAUTE COUTURE DE LA NATURE

THE ABSOLUTE ELITE OF PLANTS FOR THE ULTIMATE LEVEL OF EFFECTIVENESS. THAT IS THE CONCEPT OF THE ABSOLUTE EDITION: SIMPLY THE BEST.

There are three types of plants that organize an extremely intensive optimization of the skin: iris, oud and ambrette.

Unfortunately, the extracts from these three plants are absolutely the most expensive ones that exist in the world of cosmetics. Basically, they are unaffordable! For example, 1 liter of iris extract costs – depending on the type of distillation – between 150,000 and 240,000 EUR. Oud and ambrette are similarly expensive.

But: if you want to attain the ultimate level of effectiveness, you need the elite of the plant world. Therefore, NOESA has developed the Absolute Edition, based on the extracts from ultimate plants. So you can give your skin the best of the best.

Iris for optimum moisture. Oud for optimum nutrition. Ambrette for optimum vitality.

A NEW STRATEGY OF CELL CARE FORMULATED IN OUR NATURE HOUSE IN CANNES / CÔTE D'AZUR

Absolute Edition is a typical representative of NOESA. NOESA is not the typical skin care that you can buy anywhere in the world. NOESA is a higher category ... real cell care.

For effective cell care, you need a caring carrier that is capable of reaching into the depths of the skin ... i.e. the layer of living cells. Only NOESA has this carrier. It has the name DANADEM and is definitely not a cream (emulsion). It consists of 5 plant substances that are essentially identical to the biological elements of the skin. In other words: DANADEM has the same substance structure as the human skin.

Using a technically complex ennoblement procedure (9 patents), the molecular structures of these 5 plant substances are changed specifically, so that they are optimally adapted to the skin.

Therefore, DANADEM not only consists of the biological elements of the skin, it also has the same molecular design of the skin. With this strategy, the valuable plant extracts ... iris, oud and ambrette ... can be transported so deep into the skin that the cell nucleus can be positively stimulated towards self-regeneration and self-optimization. More Cell Care is impossible.

THE HIGHEST VERSION OF ALCHEMETICS

If you want the best of the best, you need not only elite plants and DANADEM, but also a workshop that is capable of making special Alchemetics in artesanal form ... i.e. by hand ... unique Alchemetics whose function is to ennoble the natural efficacy of the plant extracts. This is a very subtle and ambitious concept.

Therefore, NOESA works consistently as a workshop. This makes it possible for us to produce highly complex Alchemetics ... adapted especially to the molecular profile of iris, oud and ambrette. So: tailor-made by hand. And thus superior in its ability to work in the depths. This is Cell Care for the elite.
