CODED HIGH HYALURON. CODED FOR SMART BEAUTY: MORE INNER EROTICISM.

It is important that your skin has more power than the stresses that have a daily negative effect on your skin ... from the outside (environment) as well as from the inside (destructive hormones). The goal is that the cells can defeat stress. Every day.

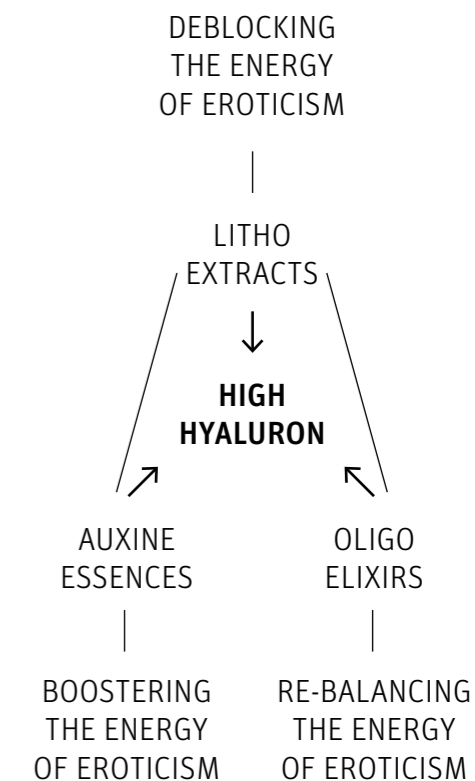

Only when this victory takes place can the skin reveal its biological attractor: inner eroticism.

For this to happen, the evolutionary force of your skin must be significantly greater than the destructive power of stress.

So the goal is to help the cells build up this superiority. This is accomplished using the strategy of targeted potentiation. This is performed by systemic coding based on selected biocatalysts. Hyaluron is coded with a very compressed quality.

In the NOESA system, these biocatalysts become active in three clusters: First, they unblock the inner erotic energy. Then they reinforce this energy. And finally, they provide a good balance. The effect:

Inner eroticism becomes the message of your face.

FEEDING THE CELLS WITH THE ENERGY OF INNER EROTICISM.

The biocatalysts are working in the cell nuclei of your skin, namely in the dynamics of the mitochondria. In other words, precisely where the cells organize their energy supply. The effect is dramatic: The energy level of the mitochondria increases to the level at which the cells produce positive hormones ... those hormones that can defeat stress and awaken your individual inner eroticism.

As a result, a very active and stable evolutionary force develops in the cells of your skin, one that optimizes your inner eroticism in 3 sectors: perfect condition, perfect glow and perfect personality.

HANDMADE NOETERIC NECTARS:

The biocatalysts ... a total of 9 ... can perform their functions in the cells only when they are fused gradually in a noeteric sequence and thereby systemically refined. This is possible only with meticulous manual workmanship in the context of

Modern Alchemy.

NOESA is the only company in the world where this method is used.

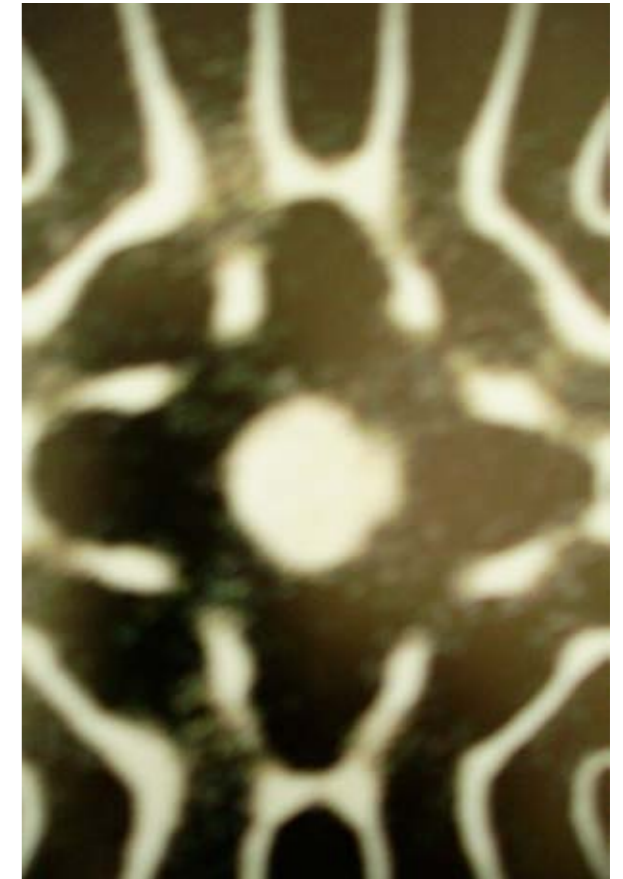

A NEW STRATEGY OF CELL CARE FORMULATED IN OUR NATURE HOUSE IN CANNES/CÔTE D'AZUR.

Nobility Collection is a typical representative of NOESA. NOESA is not the typical skin care that you can buy anywhere in the world. NOESA is a higher category ... real cell care.

For effective cell care, you need a caring carrier that is capable of reaching into the depths of the skin ... i.e. the layer of living cells. Only NOESA has this carrier. It has the name DANADEM and is definitely not a cream (emulsion). It consists of 5 plant substances that are essentially identical to the biological elements of the skin. In other words: DANADEM has the same substance structure as the human skin.

Using a technically complex ennoblement procedure (9 patents), the molecular structures of these 5 plant substances are changed specifically, so that they are optimally adapted to the skin.

Therefore, DANADEM not only consists of the biological elements of the skin, it also has the same molecular design of the skin. With this strategy, the valuable natural extracts ... litho, auxine and oligo ... can be transported so deep into the skin that the cell nucleus can be positively stimulated towards self-regeneration and self-optimization and inner eroticism. More Cell Care is impossible.

THE HIGHEST VERSION OF ALCHEMETICS.

If you want the best of the best, you need not only elite components of nature and DANADEM, but also a workshop that is capable of making special Alchemetics in artisanal form ... i.e. by hand ... unique Alchemetics whose function is to ennoble the natural efficacy of the natural extracts. This is a very subtle and ambitious concept.

Therefore, NOESA works consistently as a workshop. This makes it possible for us to produce highly complex Alchemetics ... adapted especially to the molecular profile of iris, oud and ambrette. So: tailor-made by hand. And thus superior in its ability to work in the depths. This is Cell Care for the elite.
