

NOĒSA

THIS IS NOESA

WHAT DOES  
NOESA  
CONSIST OF?  
WHAT IS IN IT?

## WHAT IS NOESA?

---

What is NOESA? In general, this question is very easy to answer:

The Concept of NOESA is lightly sophisticated and worldwide unique.

NOESA guarantees the absolute maximum of perfection.

This is NOESA.

## NOESA HAS DANADEM... WHAT IS THAT?

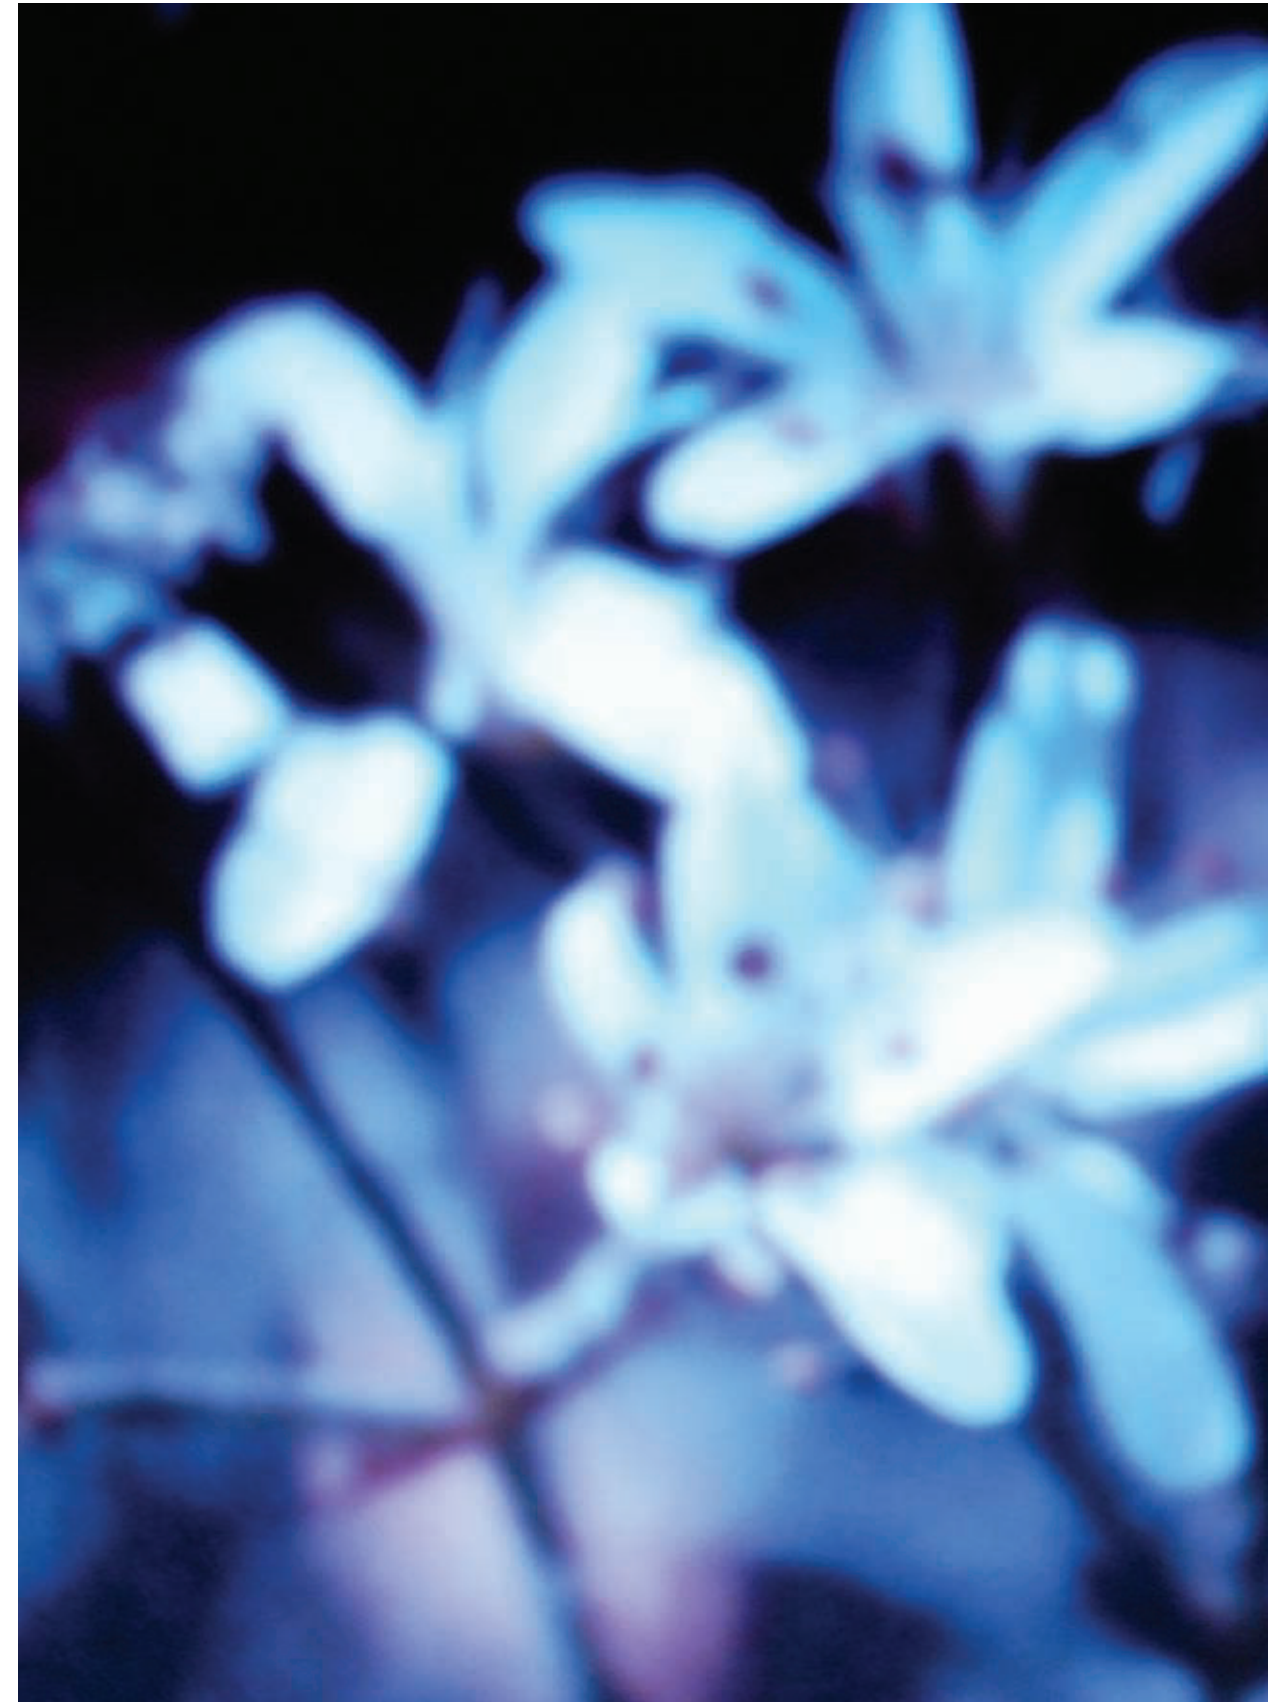

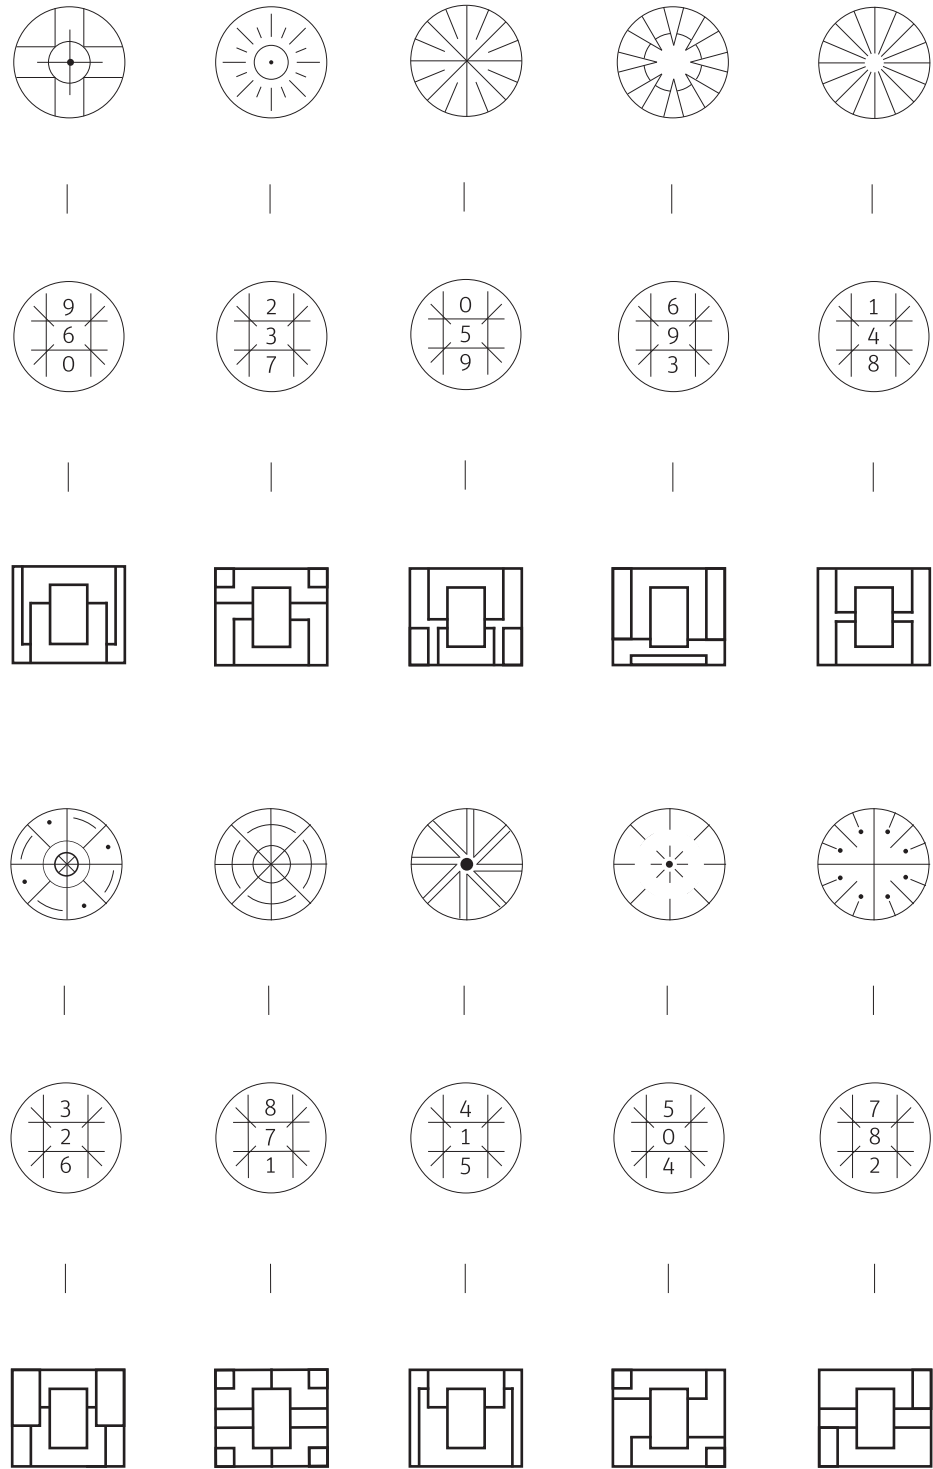

---

„DANADEM is our name for what is known as a ‚carrier‘, which means a complex of ingredients that have the task of transporting certain skin care substances ( ‚active agents‘ ) to the cells of the skin.

DANADEM is thus our carrier. As such, it has two goals to fulfill: the first is to combine the ingredients so harmoniously that they can flawlessly organize the desired transport to the cells.

The second goal is to technically process the complex of ingredients in such a way as to create a material structure that is as close as possible to the internal structure of the skin.

If both goals are met, DANADEM will emerge.“

## NOESA HAS ALCHEMETICS... WHAT IS THAT?

„ALCHEMETICS consists of the extracts of special plants that form a composite that fuses the various characteristics (signatures) of the plants.

This fusion is done by hand. The aim is that natural energy patterns develop that can be useful for a person's skin ... as a stimulus for care and regeneration.

There are different types of ALCHEMETICS for NOESA products. The differences are due to the selective differentiation of the plants ... the signature thus shape different types.

All in all, there is an interplay of herbal signatures with our exclusive fusion techniques. Only NOESA works with Alchemetics.“

# FOR THE OPTIMIZATION OF YOUR SKIN

---

An extremely intensive care effect is enabled when the biological self-optimization of the skin cells is activated.

The beauty of your face is enhanced when the innerradiance is activated in the cell configurations of the skin.

# THE POWER OF OUR PLANTS

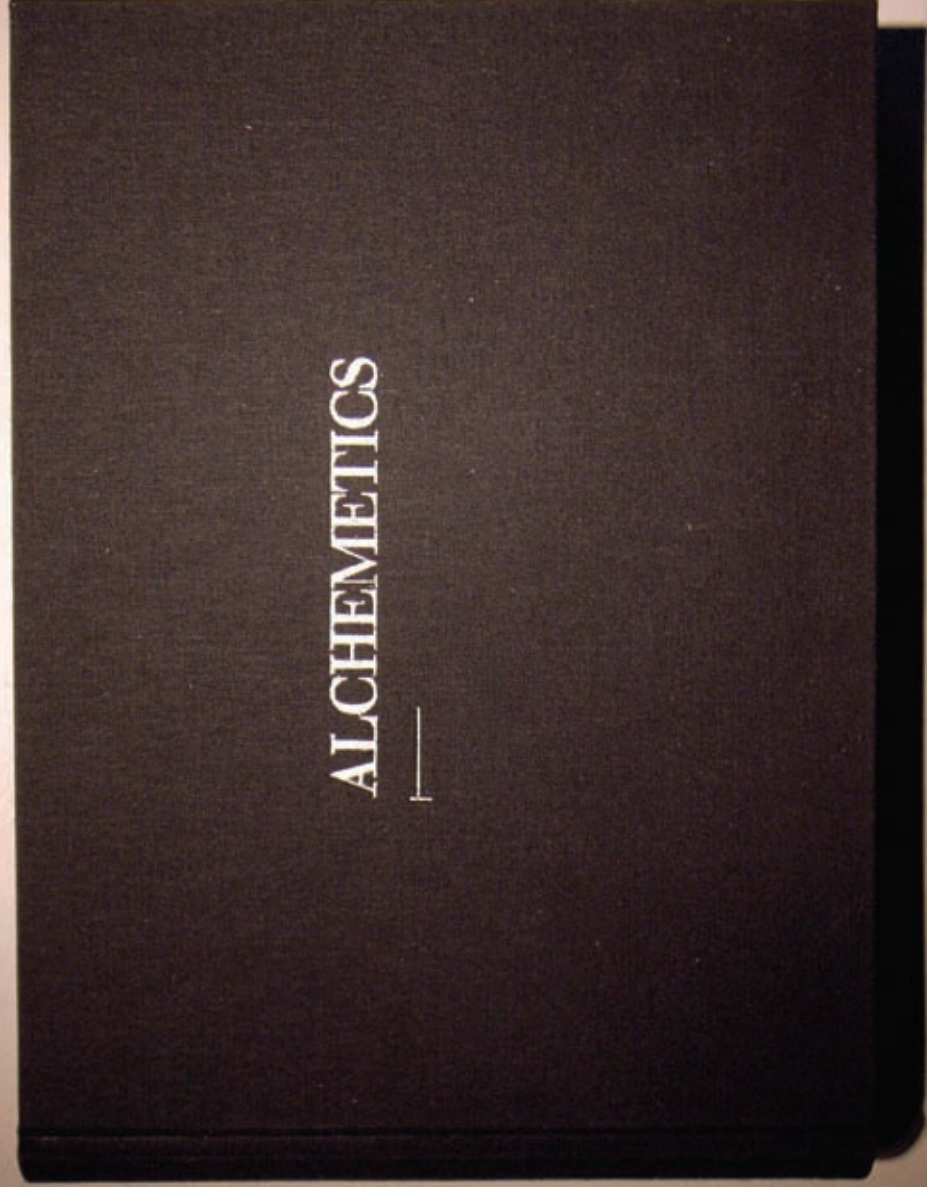

The power of our plants creates a resonance field that activates the natural resources for repairing the cells of your skin.

Due to the noetic fusion of valuable ingredients, our care products can simulate the biological self-optimization of your skin.

The complex interaction of plant extracts and skin-like stimulators makes our care concept unique.

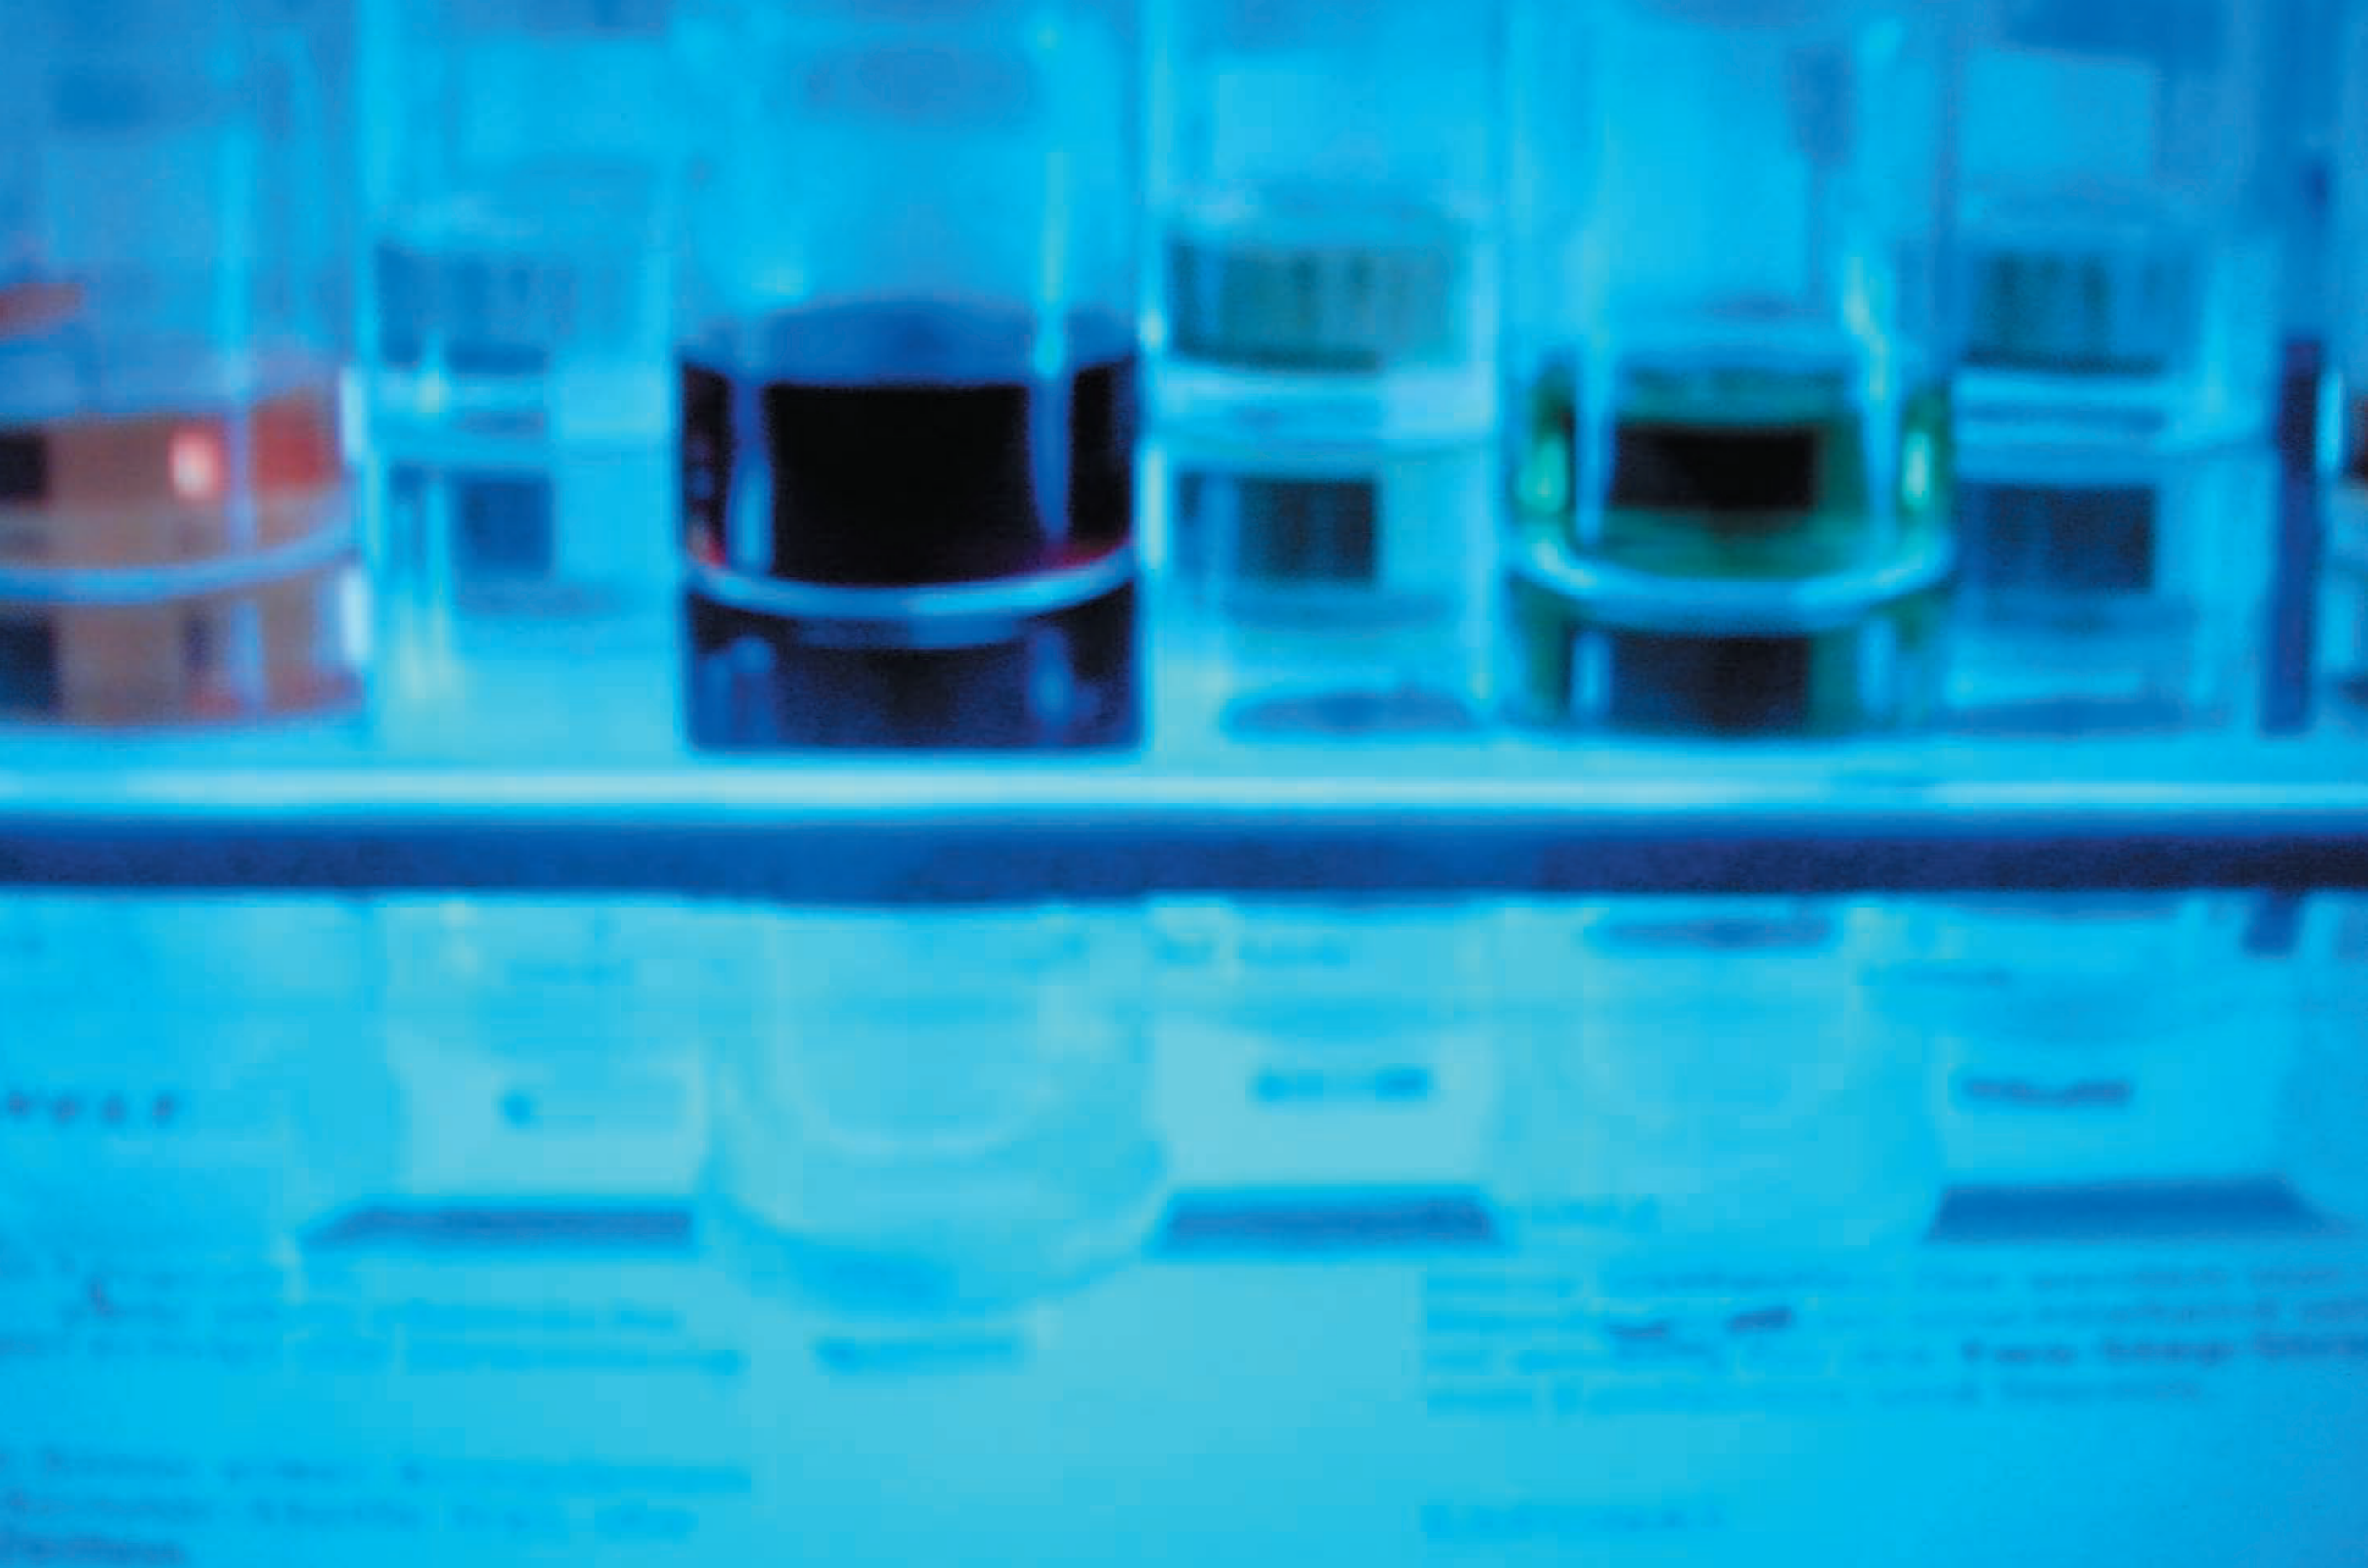

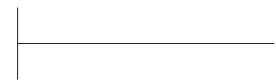

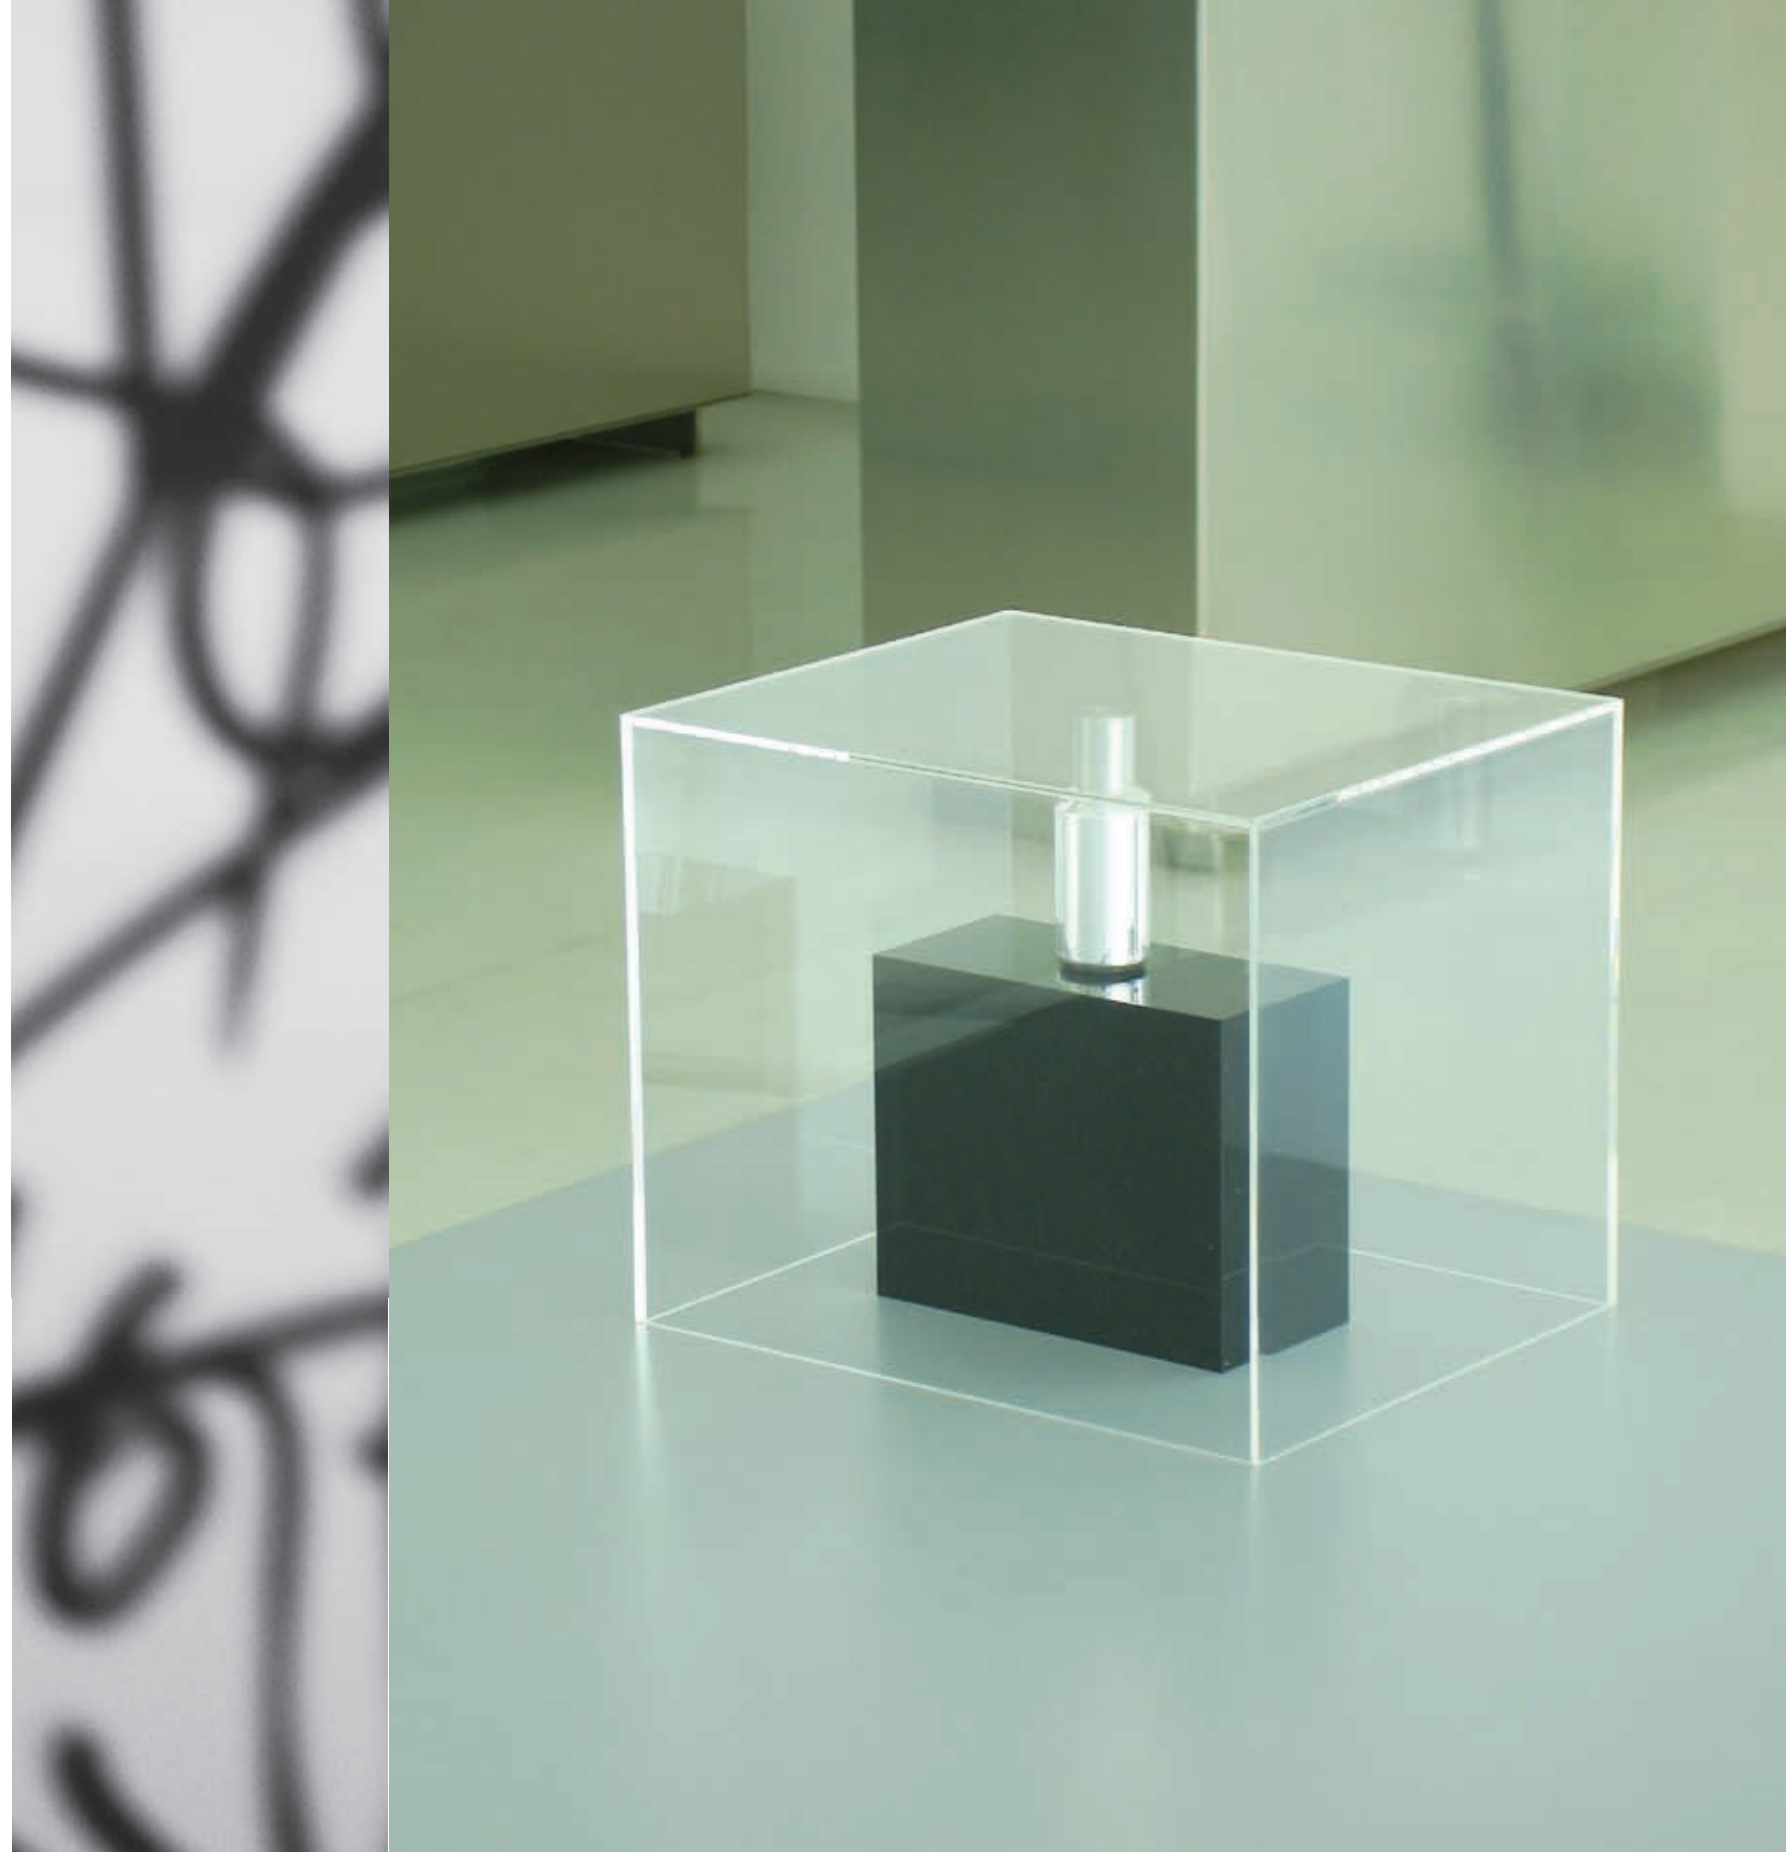

YOUR  
SKIN  
BECOMES  
MORE  
AND MORE  
ATTRACTIVE  
IN A  
NATURAL  
WAY

# BIOPHOTONS

Trust the intelligence  
of our healing plants.

# HAUTE COUTURE DE LA NATURE

---

The beauty  
of your face  
is our mission.

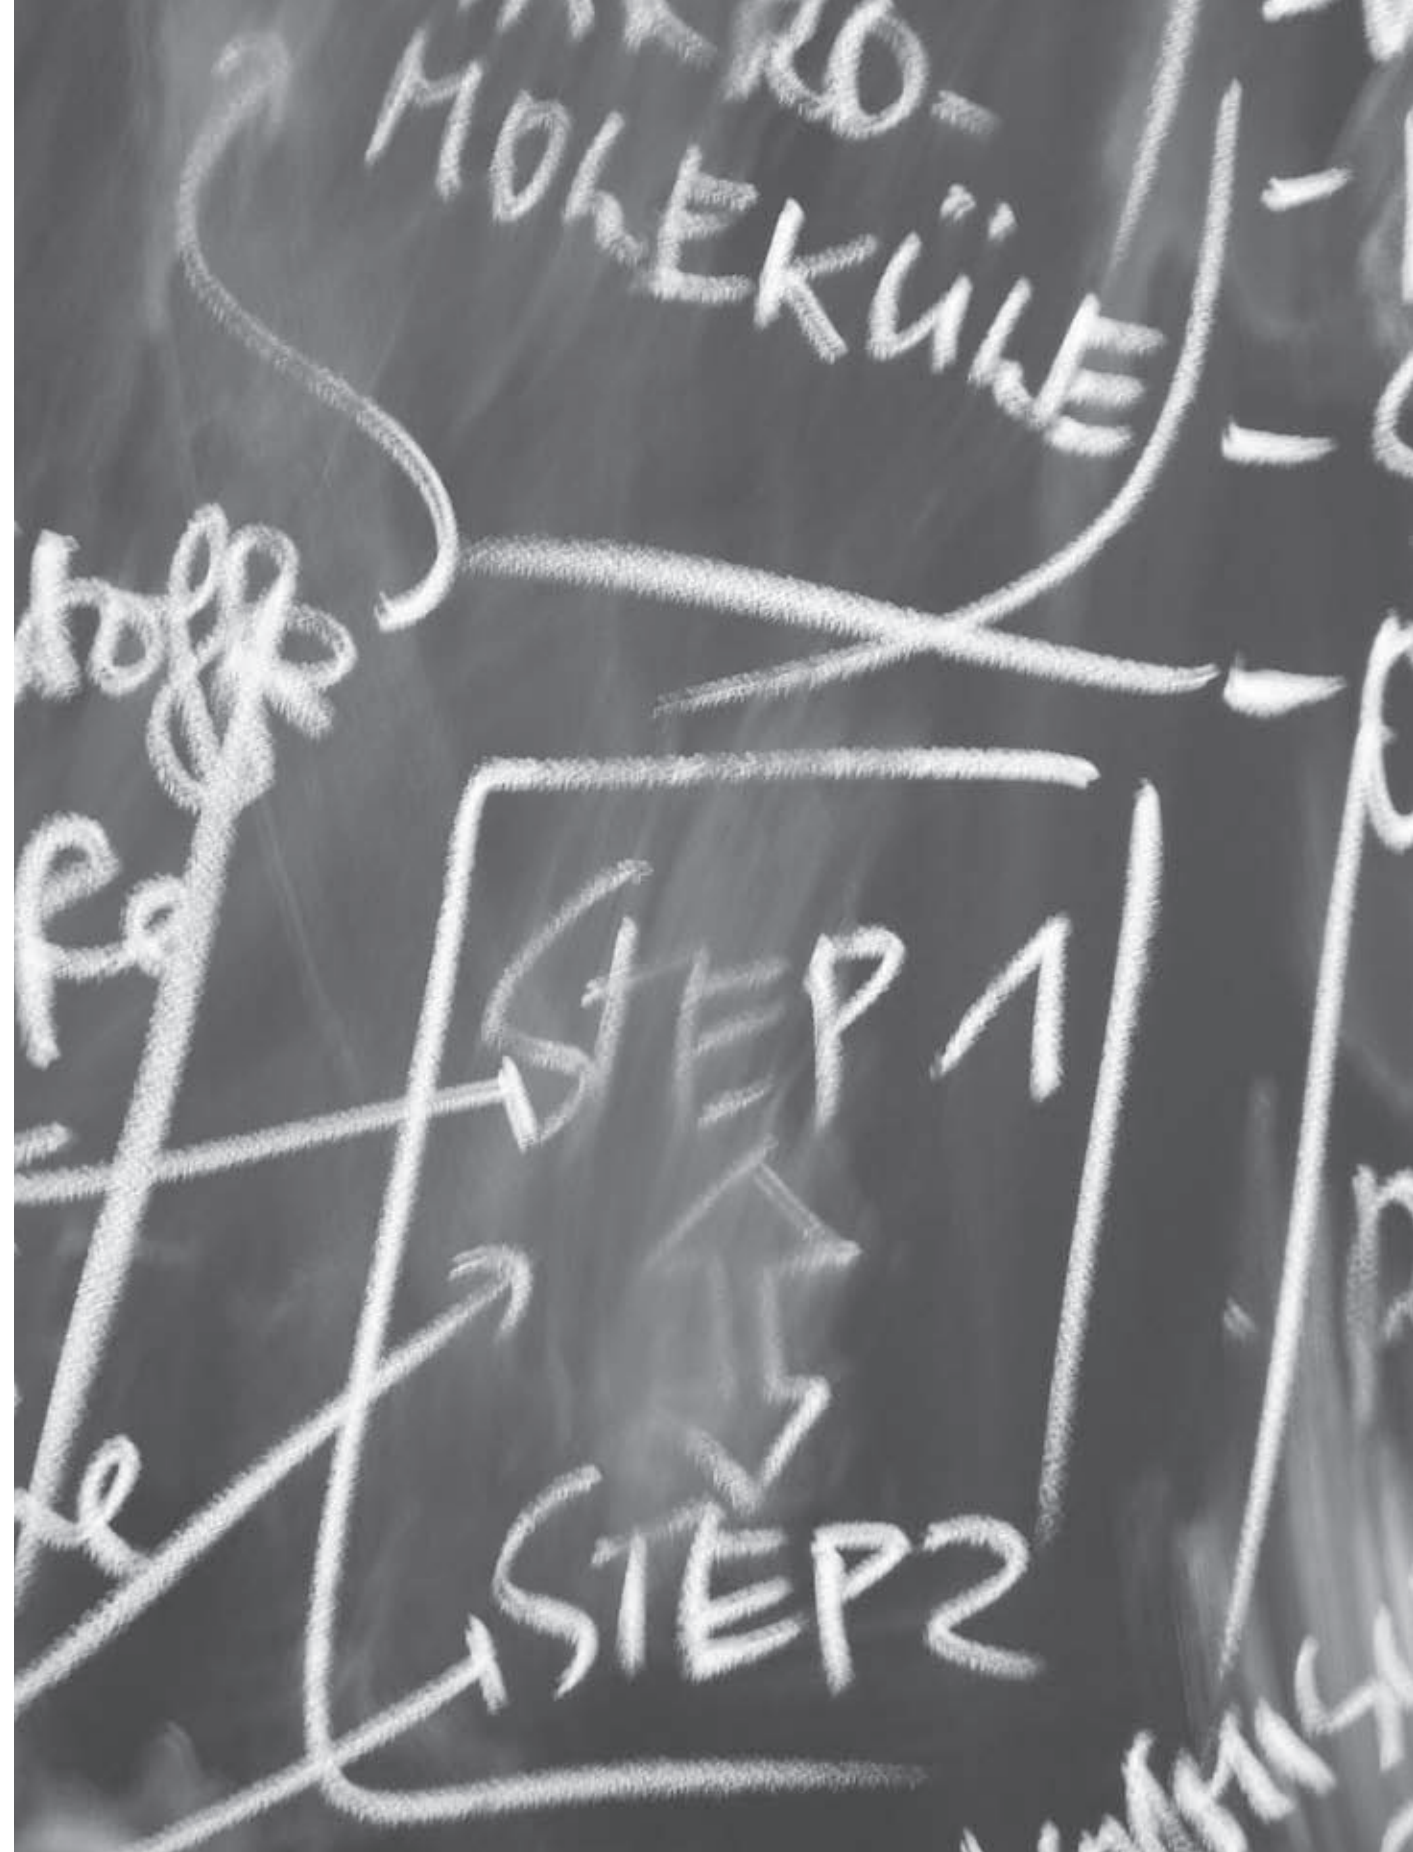

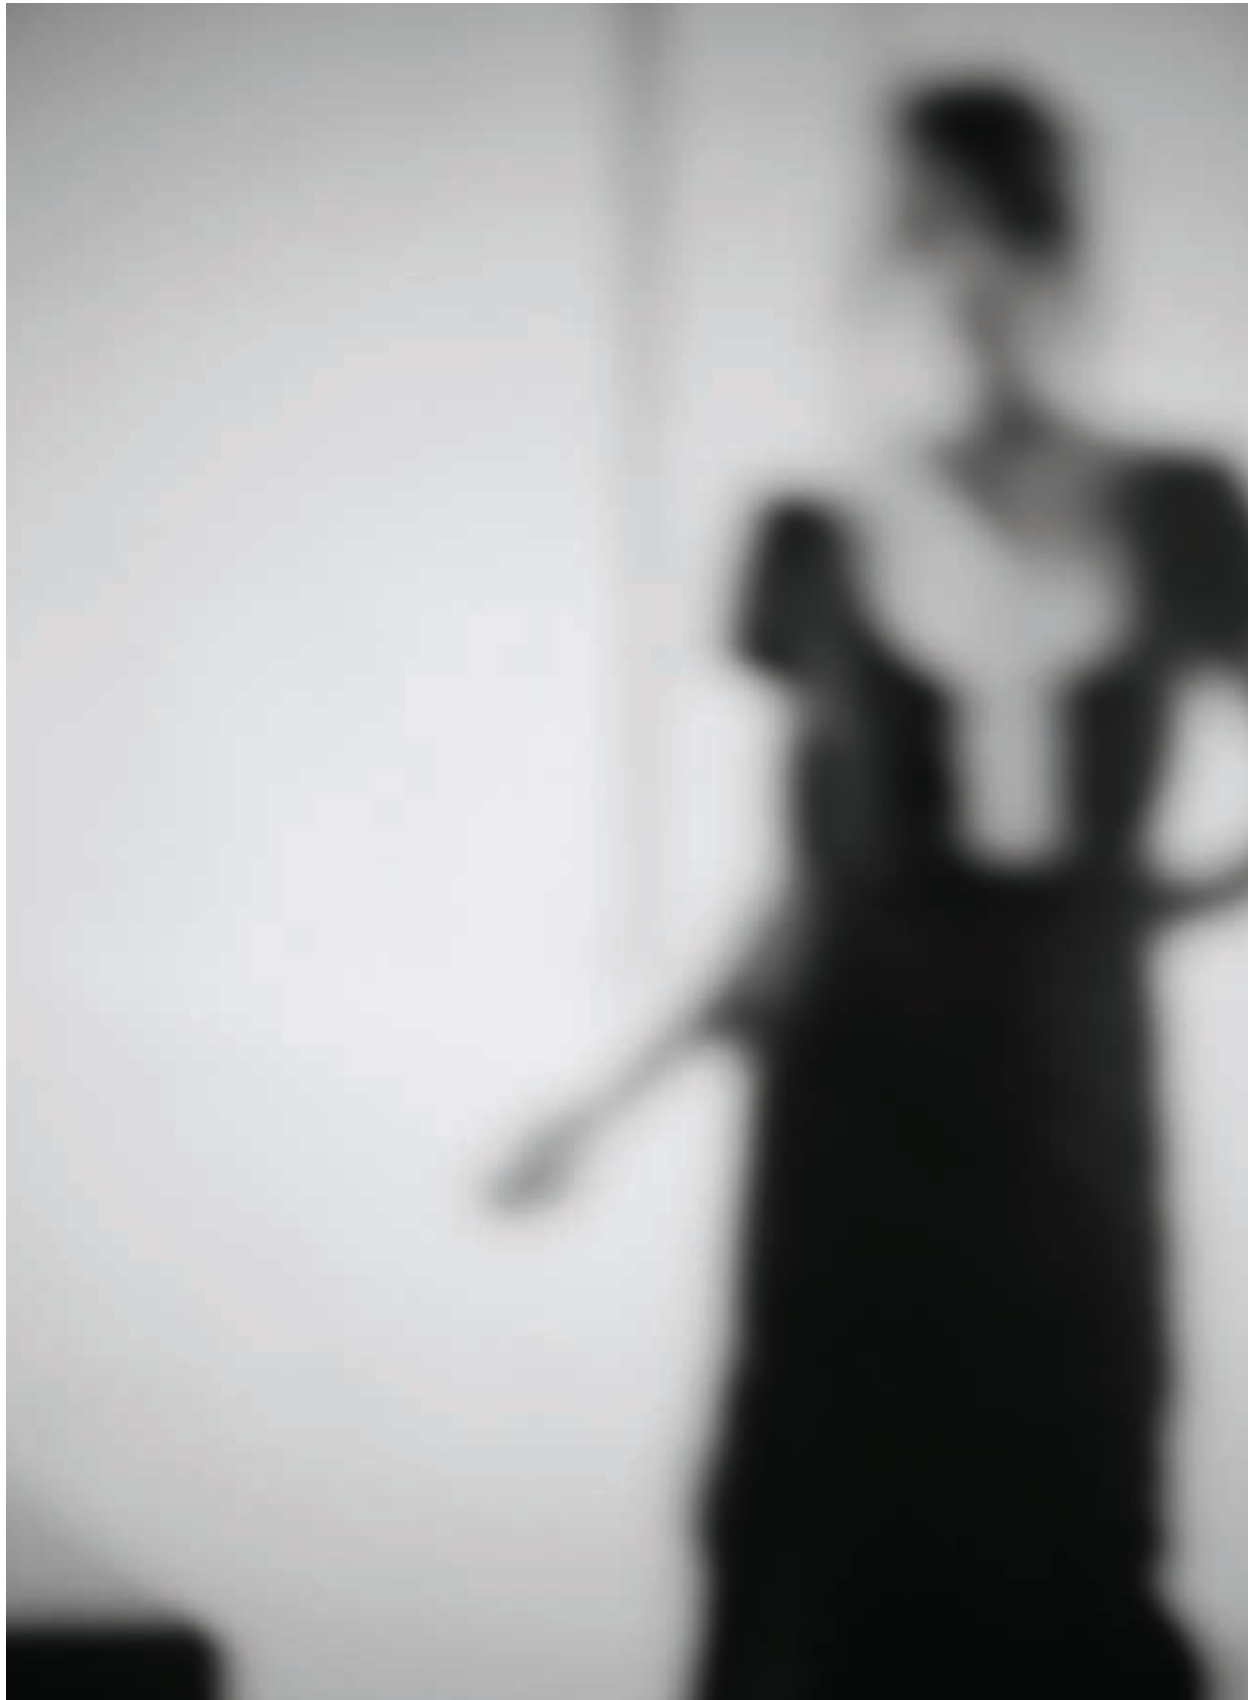

# THE ART OF BEAUTY

Our target is to optimize the glow  
and the radiation of your face.

## THE STORY BEHIND

---

In the 1980s, Gerd Gerken began carrying out completely novel courses in rituals. These are called Mind Design because they combine the scientific fields of brain research (Mind) and system theory (Design) with modern mystics and holistics (Energy Body).

In Europe, these rituals are becoming an insider tip for the cultural elite, i.e. entrepreneurs, managers, politicians, physicians, journalists, artists, architects and designers.

Each ritual course takes 6 years and has 3 levels. The 3rd level is oriented to “waking the higher light”. On this 3rd level, it happens more and more often that the participants experience “Satori”. This is a short-term form of enlightenment, caused by an intense melding of the Mind with the Light of Life. During every Satori, a visual sensation takes place:

You suddenly receive a radiantly beautiful face. Aura and Charisma are suddenly fully developed. The eyes shine and the skin becomes smooth and young-looking. This is the Satori effect.

Since this Satori effect occurred so often, Gerd Gerken became intensely interested in its energy-related and biochemical causes. In the early 1990s, this led to a research project with the title:

“The science of spontaneous beauty”.

The idea is fascinating: if Satori can cause this spontaneous beauty, then there must be other ways of generating the same effect ... apart from Satori:

A spontaneous beauty that you can awaken every day.

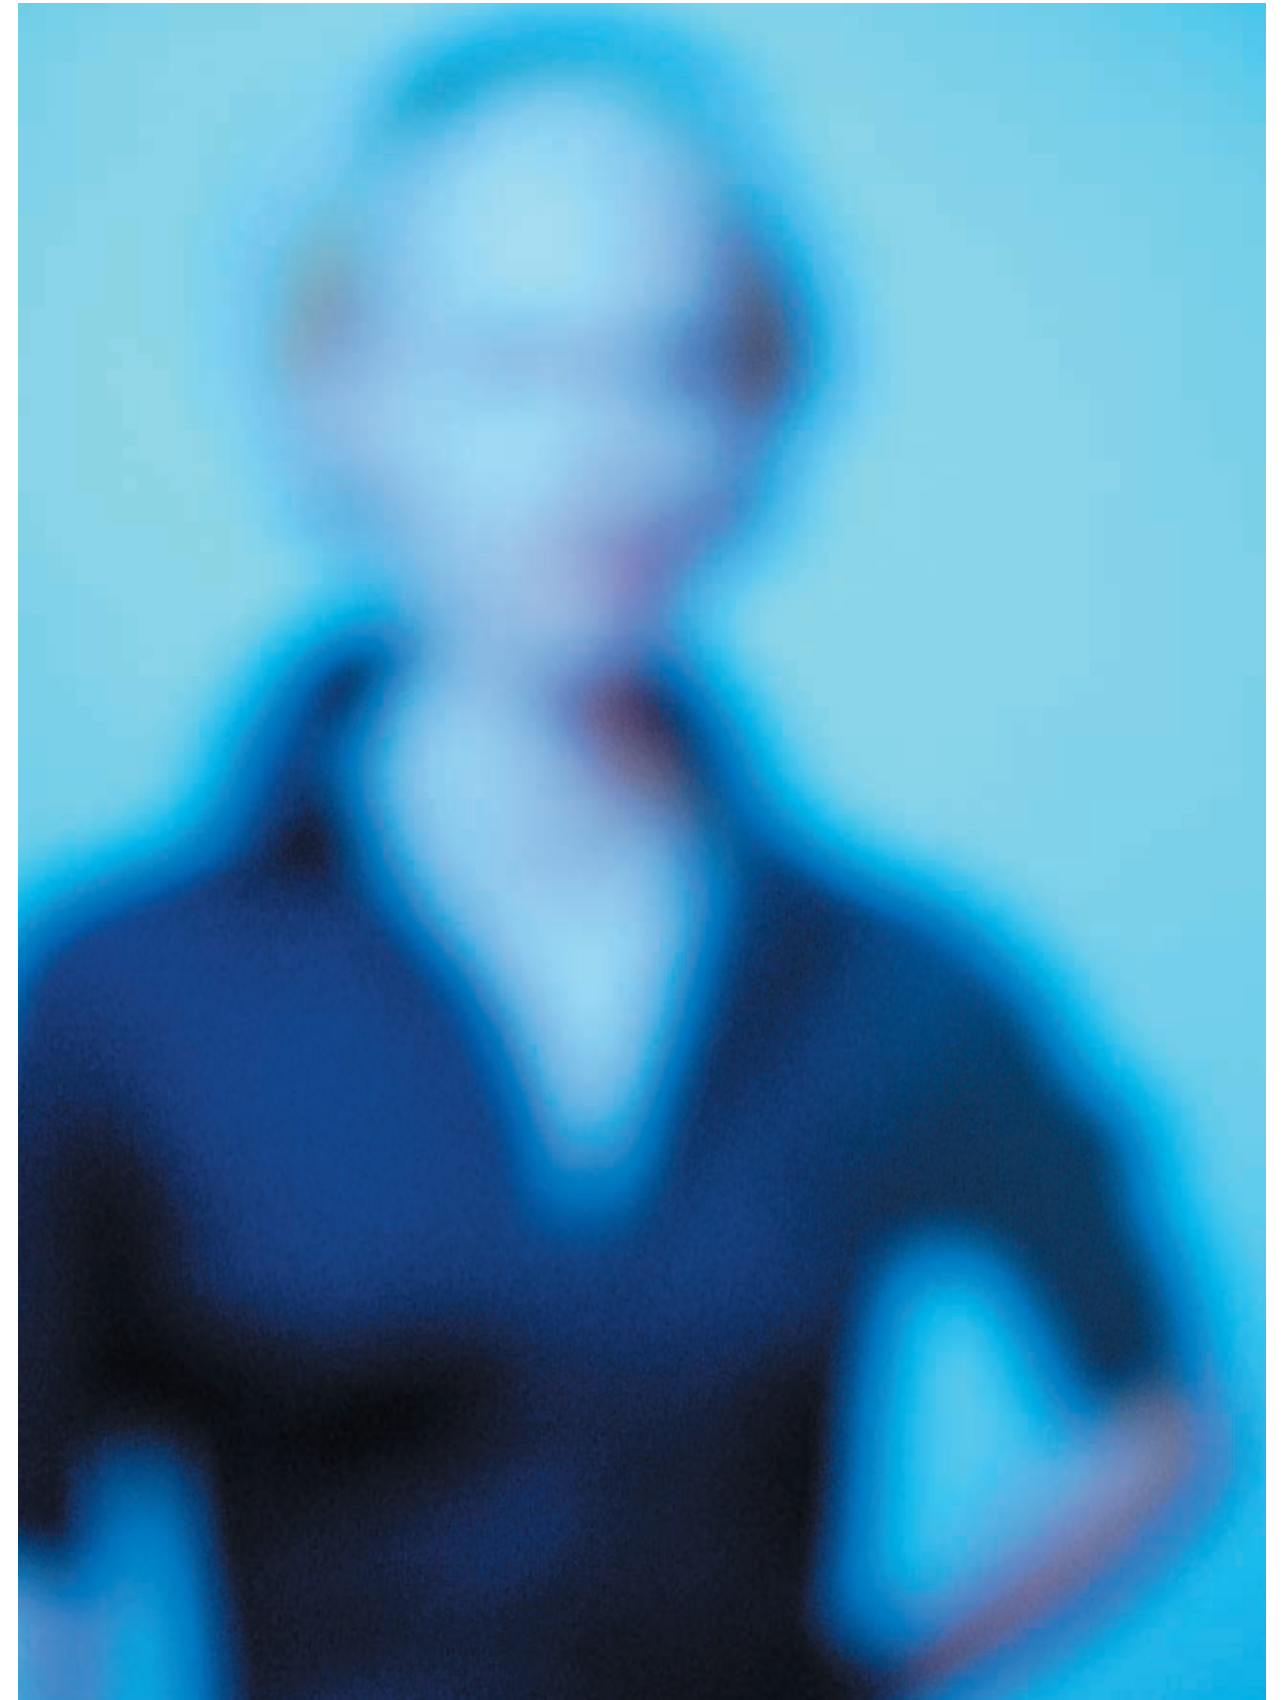

On this basis, Gerd Gerken's team began to test the energizing potentials of macromolecules and biophotons. At the same time, it developed strategies to transfer the positive effects of healing plants to the cells' metabolism of light.

The result of about 10 years of experimentation is a programmed materialized light that is capable of "switching on" inner radiance in every face. This substance is called ALCHEMETICS. It offers something for which many people have searched for so long: The specific improvement of their personal attractiveness:

The soul of beauty.

Based on this, Gerd Gerken founded NOESA in 2004 and developed the world's only skin care system that uses ALCHEMETICS ... for the development of spontaneous beauty:

"I look better every day".
